_maintenance

WOOD

To maintain the natural wood features and protect them from mechanical and chemical wear, the veneered surfaces are coated with a high-quality transparent varnish.

Do not use acid or alkaline detergents, agents with bleaching additives, abrasive powders, steel wool, sponges or the like. Anything hot or humid can cause surface damage. Remove dirt and liquids immediately.

For the cleaning and care, it is best to use a soft, dry cloth. If necessary, the cloth can be slightly dampened and dipped in neutral detergent thoroughly diluted in water. The cloth should only be slightly damp to avoid discoloration or swelling of the surface. Finally, it is essential to gently rub dry surfaces, so that there is no residual moisture.

LEGNO

Per mantenere il carattere naturale del legno e proteggerlo dall'usura meccanica e chimica, le superfici impiallacciate sono rivestite con una vernice trasparente di alta qualità.

Non usare detergenti acidi o alcalini, agenti con additivi sbiancanti, polveri abrasive, lana d'acciaio, spugne o simili. Qualsiasi cosa calda o umida può causare danni alla superficie. Rimuovere immediatamente sporco e liquidi.

Per la pulizia e la cura, è preferibile utilizzare un panno morbido e asciutto. Eventualmente il panno può essere leggermente inumidito ed intinto in detergente neutro abbondantemente diluito in acqua. Il panno deve essere solo leggermente umido, per evitare scolorimenti o rigonfiamenti della superficie. È infine essenziale strofinare gentilmente le superfici asciutte, in modo che non sussista umidità residua.

_maintenance

_LEATHER

The finish of the finest leathers can be seriously damaged through the use of improper or unsuitable products; damage occurs over time, after several cleaning operations. Do not use acids or alkali-based cleaners. Never use stain removers, shoe cream, solvents, floor wax, cosmetics or other harsh cleaners. Do not use abrasive agents, steel wool, pot cleaners or similar. It is recommended to protect the product from abrasion, humidity and other factors so that the surface is not irreparably damaged. It is advisable not to expose the product to strong heat sources, as this can alter its appearance. For cleaning and care, regularly wipe the leather surface with a soft cloth. Use the blunt nozzle of a vacuum cleaner to remove any crumbs and sand.

Attention: Nubuck grain leathers as well as leathers finished with aniline cannot be absolutely cleaned, except with a simple soft and completely dry cloth. Any product could irreparably damage the skin.

_PELLE

La finitura delle pelli più pregiate può danneggiarsi gravemente con l'uso di prodotti impropri o non idonei; i danni si manifestano con il passare del tempo, dopo diverse operazioni di pulizia. Non utilizzare acidi o detergenti a base di alcali. Non usare mai smacchiatori, crema per scarpe, solventi, cera per pavimenti, cosmetici o altri detergenti aggressivi. Non utilizzare agenti abrasivi, lana d'acciaio, detergenti per pentole o simili. Si consiglia di proteggere il prodotto da abrasione, umidità e altri fattori in modo che la superficie non venga danneggiata irreparabilmente. Si consiglia di non esporre il prodotto a forti fonti di calore, poiché questo può alterarne l'aspetto. Per la pulizia e la cura, spolverare regolarmente la superficie della pelle con un panno morbido. Utilizzare l'ugello smussato di un'aspirapolvere per rimuovere eventuali briciole e sabbia. Attenzione: le pelli fiore Nabuk così come le pelli rifinite con anilina non possono essere assolutamente pulite, se non con un semplice panno morbido e completamente asciutto. Qualsiasi prodotto potrebbe danneggiare irreparabilmente la pelle.

_maintenance

VELVET

Our velvet fabrics must be dry cleaned. Deep cleaning and spot cleaning should only be performed by a tapestry cleaning expert. Depending on the wear and on the colour of the velvet, we recommend a professional deep cleaning every four to five years. In our experience, it is not always possible to remove the signs of wear on the seat by treating the fabric.

Do not use acids or alkali-based cleaners. Do not use stain removers, shoe cream, solvents, floor wax, cosmetics or other harsh cleaners. Do not use abrasive agents, steel wool, pot cleaners or similar. It is recommended to protect the product from abrasion, humidity and other factors so that the surface is not irreparably damaged.

For cleaning and care, it is recommended to brush the surfaces regularly using a soft brush (such as a clothes brush) following the natural grain of the fabric. Loose dust and dirt can be removed regularly from velvet by vacuuming with a special nozzle for tapestry or soft-bristled upholstery. The nozzle must not have protrusions or sharp edges, as they could damage the velvet. If necessary, you can clean the product with a damp suede, applying light pressure and following the natural grain of the fabric.

VELLUTO

I nostri tessuti in velluto devono essere lavati a secco. La pulizia profonda e la pulizia di macchie devono essere eseguite solo da un esperto addetto alla pulizia della tappezzeria. A seconda dell'usura e del colore del velluto, si consiglia una pulizia profonda professionale ogni quattro-cinque anni. Per la nostra esperienza, non è in ogni caso sempre possibile rimuovere i segni dell'usura sulla seduta trattando il tessuto.

Non utilizzare acidi o detergenti a base di alcali. Non usare smacchiatori, crema per scarpe, solventi, cera per pavimenti, cosmetici o altri detergenti aggressivi. Non utilizzare agenti abrasivi, lana d'acciaio, detergenti per pentole o simili. Si consiglia di proteggere il prodotto da abrasione, umidità e altri fattori in modo che la superficie non venga danneggiata irreparabilmente.

Per la pulizia e la cura, si consiglia di spazzolare regolarmente le superfici usando una spazzola morbida (come una spazzola per vestiti) seguendo le venature naturali del tessuto. La polvere e lo sporco sciolto possono essere rimossi regolarmente dal velluto aspirando con una speciale bocchetta per tappezzeria o imbottiti a setole morbide. La bocchetta non deve presentare risalti o spigoli vivi, poiché potrebbero danneggiare il velluto. Se necessario, è possibile pulire il prodotto con una pelle scamosciata umida, facendo una leggera pressione e seguendo le venature naturali del tessuto.
